Trusted • Practical • Actionable

Everything you need to start selling through social media—step by step.

MEGATECH TECHNOLOGIES

SOCIAL COMMERCE BUSINESS STARTER & GROWTH SYSTEM

The practical checklist for choosing a model, building an audience, creating content, starting conversations and turning attention into sales.

THE PROBLEM THIS GUIDE SOLVES

“I want to sell products online through social media, but I don't know which platform to start with, how to set everything up, how to get customers, what to post, or how to turn followers into buyers.”

What you get

- A business-model selection framework
- Five-channel social-commerce strategy
- Startup and account setup checklists
- Customer acquisition and audience-growth system
- 30-day copy-and-paste content calendar
- Sales, follow-up, service and fulfillment checklists
- Weekly and monthly performance review system

1. Introduction

Social commerce is the practice of using social platforms to attract attention, build trust, communicate with prospects, present offers, receive enquiries and guide people toward a purchase. It can support physical products, digital products, services, affiliate offers, pre-orders and local businesses.

This guide is designed as an implementation system rather than a collection of motivational tips. You will make decisions, complete setup tasks, publish content, start conversations, measure evidence and improve the system.

THE CORE ROADMAP

Visibility → Followers → Audience → Engagement → Conversations → Leads → Customers → Repeat Customers → Referrals

You do not need to master every platform at once. The goal is to choose a sensible starting point, build one repeatable operating system and expand only after the basics are working.

How to use the guide

WHAT TO DO: Work through the sections in order unless a decision box tells you to skip ahead.

WHY IT MATTERS: Starting with the foundation prevents you from creating content for a business that has no clear offer, audience or fulfillment process.

HOW TO DO IT: Keep a notebook or digital worksheet. Tick each item only when you have evidence that it is complete.

WHAT TO EXPECT: You should finish with a defined offer, chosen primary platform, customer journey, content system, sales process and review routine.

WHAT TO CHECK: A task is complete when another person could inspect your setup or process and understand what you are doing without needing you to explain it verbally.

WHAT TO DO NEXT: Move to the next stage and begin testing in the real market.

2. The Social Commerce Opportunity

People increasingly discover products through content, conversations, communities, recommendations and creator-led education. That creates an opportunity for small businesses to compete through relevance and relationships rather than trying to look like a large corporation.

The opportunity is not simply “get followers.” A follower who never sees, trusts or understands your offer may never become a customer. Your real objective is to build a system that repeatedly connects the right people with a useful offer and an easy next step.

The social-commerce funnel

Stage	Customer question	Your job	Useful evidence
Visibility	Who are you?	Publish discoverable, relevant content.	Reach, views, profile visits
Followers	Should I keep seeing this?	Give people a reason to follow.	Follower growth, follows per post
Audience	Do I trust this business?	Teach, demonstrate, answer and show proof.	Replies, saves, shares, returning viewers

Stage	Customer question	Your job	Useful evidence
Conversation	Can you help me?	Invite and handle enquiries professionally.	DMs, WhatsApp chats, comments
Lead	Is this right for me?	Qualify needs and explain the offer.	Qualified enquiries
Customer	Should I buy?	Reduce uncertainty and make ordering easy.	Orders, conversion rate
Repeat	Should I buy again?	Serve well and follow up.	Repeat purchase rate
Referral	Who else needs this?	Ask satisfied customers for legitimate referrals.	Referral enquiries

3. Who This Guide Is For

- A beginner who wants to start selling through social media.
- A small business owner who already has a product but no consistent social-media sales system.
- A service provider who wants to generate enquiries from social content.
- A digital-product creator who needs an audience and sales process.
- A reseller, affiliate marketer or pre-order seller who needs a practical operating framework.
- A local business that wants social media to support enquiries, visits, orders or delivery.

IF YOU ARE NEW

You do not need an existing audience to begin. You do need a clear offer, a realistic customer, consistent visibility and the discipline to learn from market feedback.

IF YOU ALREADY HAVE AN AUDIENCE

Do not automatically restart from zero. Audit your current audience, offer, content and conversion process, then begin with the weakest stage.

4. Choosing Your Social-Commerce Business Model

Choose the model that fits your resources, skills, risk tolerance, product access and customer needs. There is no single best model for everyone.

Model	How it works	Advantages	Risks / constraints	Good fit
Manufacture / Make	You create the product.	Control, differentiation, brand potential.	Production costs, quality control, capacity.	People with a product-making skill or production setup.
Wholesale + Resale	Buy inventory and resell.	Simple concept, control over stock.	Upfront capital, unsold inventory.	Beginners who can source reliably.
Dropshipping	Supplier fulfills customer orders.	Lower inventory requirement.	Supplier reliability, delivery, margins, customer experience.	Businesses with a verified supplier and suitable market.
Affiliate / Referral	Recommend another company's product for commission.	No inventory and lower fulfillment burden.	Commission dependence, platform/program rules.	Content creators and niche educators.

Model	How it works	Advantages	Risks / constraints	Good fit
Digital Products	Sell files, courses, templates or other digital assets.	Scalable delivery and low physical fulfillment.	Need for trust, support and strong positioning.	Creators with useful knowledge or resources.
Services	Sell expertise, labor or professional outcomes.	Low inventory and direct customer relationship.	Capacity constraints and scope management.	Consultants, designers, technicians and specialists.
Pre-order	Collect orders before purchasing/producing.	Reduces inventory risk.	Requires clear timelines and trust.	Businesses with predictable sourcing/production.
Made-to-order	Produce after a customer orders.	Lower finished-stock risk.	Longer fulfillment time.	Customized or personalized products.
Local sourcing + resale	Source locally and sell through social channels.	Can support fast delivery and local relevance.	Sourcing consistency and logistics.	Local-market sellers.
Lead generation for existing business	Use social content to generate enquiries for an offline operation.	Can leverage existing operations.	Requires good follow-up and measurement.	Stores, schools, workshops, farms and local services.

Business-model decision checklist

- ☐ I know exactly what I will sell.
- ☐ I can explain who the offer is for.
- ☐ I know how the product/service will be sourced or delivered.
- ☐ I have calculated direct costs before setting a price.
- ☐ I understand my expected gross margin.
- ☐ I can realistically fulfill the expected number of orders.
- ☐ I understand the major risks of this model.
- ☐ I have a backup plan if my main supplier, platform or delivery method fails.
- ☐ My model fits my available time and starting resources.
- ☐ I can explain why a customer should buy from me rather than an alternative.

5. The 5 Recommended Social-Commerce Platforms

The five channels in this guide are WhatsApp Business, Instagram, TikTok, Facebook and YouTube. They are not identical. A smart beginner chooses a primary channel and uses supporting channels where they add value.

CURRENT-FACT VERIFICATION RULE

Platform menus, eligibility, commerce features, fees, monetization, advertising rules and country availability can change. Verify current platform documentation before publishing a final commercial version of this guide or making a setup decision.

Channel	Best suited for	Good business types	Discovery / sales path	Beginner setup	Key caution
WhatsApp Business	Conversation, enquiries, follow-up and relationship-based selling.	Local businesses, services, products with questions before purchase.	Direct conversations; existing contacts and referrals can become a warm starting point.	Business profile, catalogue/features where available, messaging workflow.	Do not broadcast unsolicited promotions or add people to groups without appropriate

Channel	Best suited for	Good business types	Discovery / sales path	Beginner setup	Key caution
					permission.
Instagram	Visual discovery, brand building, social proof and product storytelling.	Fashion, beauty, food, services, digital products, creators and visual brands.	Reels, posts, Stories, search/discovery, collaborations and profile visits.	Professional account, clear bio, contact path, consistent visual identity.	Do not build the whole business around vanity metrics; measure enquiries and sales.
TikTok	Fast discovery, educational/entertaining short video and product awareness.	Demonstrable products, problem-solving products, creators and visually engaging businesses.	For You discovery, search, short video, LIVE where available and creator/business tools.	Business account may be useful; exact commerce tools vary by market.	Do not assume TikTok Shop is available in every country. Current TikTok documentation lists Nigeria for Business Account verification but not for TikTok Shop seller availability.
Facebook	Community, local discovery, pages, groups, messaging and paid reach.	Local businesses, broad consumer offers, communities and businesses serving older/mixed audiences.	Pages, groups where promotion is allowed, Marketplace where eligible, recommendations and messaging.	Facebook Page, business information, messaging and secure admin access.	Follow group rules; avoid repetitive promotional posts and engagement bait.
YouTube	Searchable education, demonstrations, reviews and long-term discovery.	Tutorials, reviews, product demonstrations, professional services and education-heavy offers.	Search, recommendations, Shorts, long-form video and links; shopping features vary by market/account.	Channel, clear positioning, strong titles/thumbnails and a conversion path.	Do not assume every YouTube Shopping feature is available to Nigerian creators. Use YouTube primarily for discovery/education unless your account is explicitly eligible for a shopping feature.

5.1 WhatsApp Business checklist

Use WhatsApp as the conversation and follow-up layer. Your goal is to make it easy for a prospect to understand what you sell, ask a question, order and receive a clear next step.

- ☐ Create or verify a dedicated business identity.
- ☐ Use a recognizable business name and consistent profile image.
- ☐ Write a concise description that states what you sell and who it helps.
- ☐ Add business contact details and relevant operating information.
- ☐ Set up a product/service catalogue if the feature is available to your account.
- ☐ Create saved replies for common questions without making replies sound robotic.
- ☐ Organize customer enquiries with labels or another simple tracking method where available.
- ☐ Prepare an order-confirmation message.
- ☐ Prepare a payment-confirmation message.
- ☐ Prepare a delivery/update message.
- ☐ Prepare a polite follow-up message.
- ☐ Enable account security and two-step verification where available.
- ☐ Create a simple customer record outside WhatsApp so important business information is not trapped in chat history.

5.2 Instagram checklist

- ☐ Choose a username that is easy to remember and relevant to the business.
- ☐ Use a professional profile image or recognizable brand mark.
- ☐ Write a bio that states the audience/problem, offer and next step.
- ☐ Use a clear contact method.
- ☐ Create a simple visual identity that can be repeated.
- ☐ Prepare at least three pinned/highlight-worthy pieces of content where the current interface supports them.
- ☐ Create content pillars before posting randomly.
- ☐ Use Reels/short video where appropriate to increase discovery.
- ☐ Create educational, proof, product and personality content.
- ☐ Review account insights and adjust based on actual audience response.
- ☐ Secure the account with two-factor authentication.

5.3 TikTok checklist

- ☐ Create or switch to the account type that fits your business and current platform rules.
- ☐ Write a profile description that makes the niche obvious.
- ☐ Create a simple content format you can repeat.
- ☐ Use short videos to demonstrate, teach, compare, answer questions or tell customer stories.
- ☐ Build searchable topics around customer questions.
- ☐ Use analytics to identify content that attracts the right viewers.
- ☐ Check current market availability before relying on TikTok Shop or other commerce features.
- ☐ If selling through a link or conversation instead of native shopping, make the transition obvious.
- ☐ Do not copy creators' content without permission or appropriate rights.
- ☐ Secure the account and control who has access.

5.4 Facebook checklist

- ☐ Create or optimize a Facebook Page for the business.
- ☐ Complete the About/business information.
- ☐ Add contact details, website and relevant service/product information.
- ☐ Set a recognizable profile and cover presentation.
- ☐ Pin a useful introduction or current offer where available.
- ☐ Join relevant communities only where the rules permit participation.
- ☐ Create educational and local-value content instead of posting only adverts.
- ☐ Use Messenger/WhatsApp/Instagram messaging pathways where relevant.
- ☐ Use Marketplace only where the feature and listing category are available and appropriate.
- ☐ Secure Page ownership and admin access.

5.5 YouTube checklist

- ☐ Choose a clear channel promise.
- ☐ Create a channel description that explains the audience and topics.
- ☐ Build repeatable video series rather than isolated videos.
- ☐ Use searchable titles based on customer questions.
- ☐ Show the product/service in use where possible.
- ☐ Use Shorts for short discovery content and long-form content for deeper trust when appropriate.
- ☐ Place a clear next step in descriptions and relevant calls to action.
- ☐ Track views, watch time, returning viewers, clicks and enquiries rather than views alone.
- ☐ Verify current YouTube Shopping eligibility before promising native product-tagging features.

6. Complete Business Startup Checklist

Stage 1 — Define the business

WHAT TO DO: Choose the business model, target customer, problem, offer and operating method.

WHY IT MATTERS: A social account cannot compensate for a confusing business.

HOW TO DO IT: Complete the Business Foundation checklist below before spending significant money on content or advertising.

WHAT TO EXPECT: You should be able to describe your business in one sentence and explain the customer problem it addresses.

WHAT TO CHECK: A stranger can read your one-sentence description and tell who the offer is for and what action to take.

WHAT TO DO NEXT: Move to product and offer preparation.

Business Foundation checklist

- ☐ Choose one primary business model.
- ☐ Define your target customer in practical terms: situation, need, buying context and location if relevant.
- ☐ Write the customer's main problem in their own likely words.
- ☐ Write your value proposition: who you help + what you provide + why it is useful/different.
- ☐ List three to five direct or indirect competitors.
- ☐ Record competitor prices, positioning, content patterns and customer complaints where observable.
- ☐ Choose a realistic starting price.
- ☐ Calculate product/service cost, packaging, delivery, transaction/platform costs and other direct costs.
- ☐ Estimate gross margin before assuming an offer is profitable.
- ☐ Confirm product availability and quality.
- ☐ Confirm supplier reliability if you do not manufacture yourself.
- ☐ Create a basic order-taking procedure.

- ☐ Create a payment procedure and proof-of-payment process.
- ☐ Create a fulfillment/delivery procedure.
- ☐ Create a customer-service procedure.
- ☐ Create a fair refund/return/cancellation policy appropriate to the offer and applicable law/platform rules.
- ☐ Create a basic sales/order record.
- ☐ Create a simple customer database or spreadsheet.
- ☐ Set a realistic weekly time budget for content, sales and fulfillment.

7. Product & Offer Checklist

People rarely buy a feature simply because it exists. They buy because the offer is relevant to a desired outcome, a problem they want solved, a convenience they value or an experience they want.

Product readiness checklist

- ☐ The product/service solves a real and identifiable customer problem.
- ☐ The quality has been checked.
- ☐ The key features are documented.
- ☐ The practical benefits are clear.
- ☐ The price is easy to understand.
- ☐ The customer knows what is included and excluded.
- ☐ Delivery/fulfillment costs are understood.
- ☐ Packaging or presentation is appropriate.
- ☐ Product photos/videos show the real offer accurately.
- ☐ A demonstration is available where useful.
- ☐ Common questions have answers.
- ☐ Common objections have answers.
- ☐ Any guarantee/warranty claim is legitimate and clearly defined.
- ☐ The call to action is specific.
- ☐ The order instructions are simple.

Feature → benefit → outcome exercise

Feature	Benefit	Customer outcome	Proof / demonstration
Example: 60-minute consultation	Customer gets focused guidance	Customer leaves with a clearer action plan	Show sample agenda/process
Example: Portable product	Easy to carry	Customer can use it in more situations	Demonstrate size/use
Example: Digital template	Saves setup time	Customer can start faster	Show template preview

SELL THE RELEVANCE, NOT HYPE

Instead of “This is the best product ever,” explain the specific situation in which the offer is useful, what it helps the customer do, and what they should realistically expect.

8. Customer Acquisition System

Where will my customers come from?

Source	Why it works	What to do	What to avoid
Existing contacts	Warm relationships	Start conversations naturally and only where appropriate.	Do not pressure contacts or repeatedly send unsolicited offers.
WhatsApp status/viewers	Existing attention	Teach, demonstrate, answer questions, show proof and invite replies.	Avoid turning every status into a hard sell.
WhatsApp groups	Community access	Contribute useful information when promotion is allowed.	Do not spam or post irrelevant adverts.
Instagram discovery	New audiences	Use useful Reels, search-friendly topics, collaborations and strong profiles.	Do not buy followers or use engagement pods that distort data.
TikTok discovery	New audiences	Demonstrate, educate, entertain and answer searchable questions.	Do not assume every viral viewer is a buyer.
Facebook communities	Interest/local communities	Participate according to group rules and add genuine value.	Do not repeatedly drop links or promotional copy.
Referrals	Satisfied customers	Ask happy customers if they know someone with the same need.	Never fabricate referrals or reviews.
Collaborations	Partner audiences	Create useful joint content or offers with complementary businesses.	Agree on responsibilities and customer handling in advance.
Micro-influencers	Relevant niche audiences	Evaluate audience quality, trust and fit before paying or exchanging value.	Do not judge solely by follower count.
Educational content	Problem-aware prospects	Teach answers to the questions your customers already ask.	Avoid giving misleading expert claims.
User-generated content	Customer proof	Request permission to share genuine customer content.	Do not manufacture or edit testimonials deceptively.
Repeat customers	Existing buyers	Create follow-up, replenishment, cross-sell or loyalty pathways where appropriate.	Do not harass customers with repeated messages.

9. Audience Growth Framework

Followers are a metric. An audience is a group of people who repeatedly recognize your topic, understand your value and are willing to interact with you. Your goal is to build an audience that contains potential buyers, not simply a large number.

The 9-stage growth system

Stage	Objective	Evidence
-------	-----------	----------

Stage	Objective	Evidence
Visibility	Be seen by relevant people.	Reach, views, discovery
Followers	Give people a reason to stay connected.	Follows
Audience	Build familiarity and relevance.	Returning viewers, saves
Engagement	Create useful interaction.	Comments, replies, shares
Conversations	Invite people into a one-to-one path.	DMs, WhatsApp chats
Leads	Identify genuine buying interest.	Qualified enquiries
Customers	Make the purchase easy.	Orders, conversion
Repeat customers	Deliver a good experience and follow up.	Repeat orders
Referrals	Turn satisfaction into introductions.	Referral enquiries

Audience-building checklist

- ☐ I know exactly who I want to attract.
- ☐ My profile clearly communicates my topic and offer.
- ☐ I have three to five content pillars.
- ☐ I can explain what makes my content useful.
- ☐ I publish consistently enough to collect learning data.
- ☐ I respond to genuine comments and enquiries.
- ☐ I ask questions that are easy for my audience to answer.
- ☐ I turn repeated customer questions into content.
- ☐ I collect legitimate customer feedback.
- ☐ I review content by business outcome, not only likes.
- ☐ I adjust topics based on evidence from my own audience.

10. Content Strategy

Five practical content pillars

Pillar	Purpose	Examples	CTA
Education	Build usefulness and authority.	How-to, checklist, mistakes, explanations.	“Comment your question.”
Problem awareness	Help prospects recognize the cost of their current problem.	Common mistakes, warning signs, before/after situations.	“If this sounds familiar, message me.”
Proof	Reduce uncertainty.	Demonstrations, customer feedback, process evidence, case examples.	“Want to know how it works?”

Pillar	Purpose	Examples	CTA
Offer	Explain the product/service and next step.	Features, benefits, price, package, availability.	“Send ‘INFO’ to get details.”
Connection	Make the business familiar and human.	Behind the scenes, founder story, values, lessons learned.	“What are you working on?”

Content quality checklist

- ☐ The first line or opening seconds identify a relevant topic.
- ☐ The content is understandable without unnecessary jargon.
- ☐ The content gives the viewer a reason to continue.
- ☐ The content demonstrates something useful or interesting.
- ☐ The offer is mentioned only when relevant to the content.
- ☐ The CTA tells the audience exactly what to do.
- ☐ The content is truthful and does not imply guaranteed results.
- ☐ The visual/audio quality is sufficient for the platform.
- ☐ The content can be reused or adapted into another format.
- ☐ The post is reviewed for spelling, pricing and contact details before publishing.

11. Copy-and-Paste 30-Day Social Media Calendar

This calendar is designed as a reusable starter system. Replace bracketed text with your actual business details. The recommended posting windows are testing ranges, not universal rules. After the first two weeks, compare your own audience activity and results and adjust.

Day	Objective	Content	Platform	Window	Copy-and-paste caption/script	CTA	Purpose	After posting	Measure	What works	Avoid
Day 1	Positioning	Intro post	Instagram/Facebook/WhatsApp	8–10am	Starting [BUSINESS] and helping [TARGET CUSTOMER] with [PROBLEM]. If you have been struggling with [PROBLEM], follow this page because I will be sharing practical tips, examples and offers that can help.	Follow / reply “START”	Introduce the business	Reply to every genuine response	Profile visits, follows	Clarity attracts the right people	Do not write a vague introduction
Day 2	Problem awareness	Short video/status	TikTok/Instagram/WhatsApp	12–2pm	If you are [TARGET CUSTOMER] and you keep experiencing [PROBLEM], here are 3 reasons it may be happening: 1) [REASON] 2) [REASON] 3) [REASON].	Which one sounds familiar?	Create recognition	Save questions for future content	Comments/replies	Specific pain points perform better	Do not exaggerate the problem
Day 3	Education	How-to	All suitable channels	6–9pm	How to [DESIRED RESULT] without [COMMON FRUSTRATION]: Step 1: [STEP]. Step 2: [STEP]. Step 3: [STEP].	Message me “HELP”	Demonstrate usefulness	Answer questions	Saves, replies, DMs	Simple steps are shareable	Do not promise guaranteed outcomes

Day	Objective	Content	Platform	Window	Copy-and-paste caption/script	CTA	Purpose	After posting	Measure	What works	Avoid
					[STEP]. If you want help applying this to your situation, message me.						
Day 4	Product relevance	Product demo	Instagram/TikTok/Facebook	12–3pm	Here is how [PRODUCT/SERVICE] works: [SHOW 2–3 FEATURES]. It is designed for [TARGET CUSTOMER] who wants [OUTCOME].	Send “INFO” for details	Connect product to use case	Send complete information, not pressure	Product enquiries	Demonstration reduces uncertainty	Do not hide limitations
Day 5	Trust	Behind the scenes	WhatsApp/Instagram/Facebook	8–10am	People see the final result, but here is what happens behind the scenes at [BUSINESS]: [PROCESS]. We focus on [QUALITY/PRINCIPLE].	Ask me anything about the process	Humanize the business	Respond to questions	Replies, profile visits	Transparency builds familiarity	Do not reveal private customer data
Day 6	Engagement	Question post	Instagram/Facebook/WhatsApp	6–9pm	Quick question for [TARGET CUSTOMER]: what is the biggest challenge you currently face with [TOPIC]? A) [A] B) [B] C) [C] D) Something else.	Comment A/B/C/D	Collect market language	Turn answers into content	Comments	Questions create research	Do not argue with responses
Day 7	Soft sell	Offer reminder	All suitable channels	12–3pm	If you have been looking for [OUTCOME], [PRODUCT/SERVICE] is available for [PRICE/STARTING PRICE]. It includes [KEY INCLUSIONS].	Message “ORDER”	Generate first enquiries	Respond with ordering steps	Enquiries/orders	Clear offers convert better than vague adverts	Do not use fake scarcity
Day 8	Education	Mistakes	TikTok/Instagram/Facebook	6–9pm	3 mistakes people make when trying to [GOAL]: 1) [MISTAKE]. 2) [MISTAKE]. 3) [MISTAKE]. Here is what to do instead: [BETTER APPROACH].	Save this for later	Build expertise	Ask which mistake they want explained	Saves/shares	Mistake-based education attracts problem-aware people	Do not shame beginners
Day 9	Proof	Demonstration	Instagram/TikTok/YouTube Shorts	12–2pm	Watch [PRODUCT/SERVICE] handle [SPECIFIC TASK]. If you are trying to [GOAL], this is the part that matters: [BENEFIT].	Want the full details? Message me.	Show rather than tell	Follow up with interested viewers	Watch time, DMs	Proof should be specific	Do not fake performance
Day 10	Connection	Founder lesson	Facebook/Instagram/YouTube	8–10am	One lesson I have learned from working on [BUSINESS/TOPIC]: [LESSON]. If I were starting again, I would [ACTION].	What would you do differently?	Build credibility through experience	Engage thoughtfully	Comments, shares	Useful lessons build trust	Do not invent achievements
Day 11	Problem awareness	FAQ	WhatsApp/Instagram/Facebook	6–9pm	Question I often hear: “[COMMON QUESTION]”. Short answer: [ANSWER]. The reason is [REASON]. If your situation is different, send me the details.	Reply with your question	Remove buying uncertainty	Create an FAQ bank	Replies/DMs	Questions reveal objections	Do not give unsafe or unsupported claims
Day	Offer	Comparison	Instagram/TikTok/Facebook	12–3pm	Choosing between [OPTION A] and [OPTION B]? Choose	Message your goal	Help prospects	Qualify before	Qualified enquiries	Honest comparison	Do not attack

Day	Objective	Content	Platform	Window	Copy-and-paste caption/script	CTA	Purpose	After posting	Measure	What works	Avoid
12					[A] if you need [USE CASE]. Choose [B] if you need [USE CASE]. If you tell me your goal, I can point you toward the more suitable option.		choose	selling		builds trust	competitors
Day 13	Community	Poll/question	WhatsApp/Instagram/Facebook	6–9pm	Let's settle this: what would help you most right now? 1) [OPTION] 2) [OPTION] 3) [OPTION].	Reply with 1, 2 or 3	Increase participation	Record responses	Replies	Low-friction questions work well	Do not manipulate votes
Day 14	Review	Best-of recap	All suitable channels	8–10am	This week we covered: [TOPIC 1], [TOPIC 2], [TOPIC 3]. If you missed them, here is the quick takeaway: [TAKEAWAY].	Which topic should I cover next?	Reinforce learning	Use responses to plan week 3	Engagement, follows	Recaps make content easier to consume	Do not simply repost without context
Day 15	Education	Checklist	WhatsApp/Instagram/Facebook	12–2pm	Before you buy [PRODUCT/SERVICE], check these 5 things: [1], [2], [3], [4], [5]. If a seller cannot explain these clearly, ask questions before paying.	Save/share this checklist	Build buyer confidence	Answer follow-up questions	Saves/shares	Practical checklists are useful	Do not create fear without evidence
Day 16	Discovery	Search-friendly video	TikTok/YouTube/Instagram	6–9pm	If you searched for "[CUSTOMER QUESTION]", this video is for you. Here are the first 3 things to know: [POINTS].	Follow for more [TOPIC] tips	Reach people actively seeking answers	Check search terms and retention	Views, watch time, profile visits	Specific questions improve discoverability	Do not keyword-stuff
Day 17	Trust	Customer feedback	All suitable channels	12–3pm	Customer feedback we received: "[SHORT AUTHENTIC FEEDBACK]". What matters to us is [SERVICE PRINCIPLE]. If you have questions about the process, ask below.	Ask a question	Show legitimate social proof	Request permission before publishing customer material	Replies, enquiries	Specific proof is stronger than hype	Do not fabricate testimonials
Day 18	Objection handling	Myth vs fact	TikTok/Instagram/Facebook	6–9pm	Myth: "[MYTH]". Fact: "[FACT]". The better way to decide is to look at [CRITERIA].	Want me to explain another myth?	Reduce objections	Collect myths from comments	Comments/shares	Evidence-based explanations build authority	Do not present opinions as facts
Day 19	Offer	Use case	Instagram/TikTok/Facebook	12–3pm	[PRODUCT/SERVICE] is not for everyone. It makes sense if you are [USE CASE 1] or [USE CASE 2]. It may not be suitable if [LIMITATION].	Tell me your situation	Pre-qualify customers	Respond honestly	Qualified DMs	Honest positioning reduces poor-fit orders	Do not hide limitations
Day 20	Engagement	This-or-that	WhatsApp/Instagram/Facebook	8–10am	Which would you choose for [GOAL]? A) [OPTION A] B) [OPTION B]. Tell me why.	Comment A or B	Learn preferences	Use answers for product/content decisions	Comments	Simple choices increase participation	Do not fake debate
Day 21	Education	Mini tutorial	YouTube/Instagram/TikTok	6–9pm	Here is a quick tutorial on [TASK]. Step 1: [STEP]. Step 2: [STEP]. Step 3: [STEP]. If you get stuck, tell me where.	Save this tutorial	Demonstrate competence	Answer questions	Watch time, saves	Tutorials create repeat viewers	Do not overcomplicate
Day	Sales	Bundle/offer	All suitable channels	12–3pm	If you need [OUTCOME], here is	Message "PACKA	Present a clear offer	Send order process	Enquiries/orders	Specific offers	Do not use fake

Day	Objective	Content	Platform	Window	Copy-and-paste caption/script	CTA	Purpose	After posting	Measure	What works	Avoid
22					the [PACKAGE/BUNDLE]: [INCLUSIONS]. Price: [PRICE]. Delivery/fulfillment: [DETAIL].	GE”				reduce friction	discounts
Day 23	Connection	Business story	Facebook/Instagram/YouTube	8–10am	Why I started [BUSINESS]: [SHORT STORY]. The problem I wanted to help solve was [PROBLEM].	What problem are you trying to solve?	Create emotional relevance	Listen to replies	Comments/D Ms	Stories make the business memorable	Do not invent dramatic claims
Day 24	Problem solving	Audit	WhatsApp/Instagram/Facebook	6–9pm	Quick self-check: if you are trying to [GOAL], can you answer these 5 questions? [QUESTIONS]. If not, start with the one you cannot answer.	Reply with the number you need help with	Generate qualified conversations	Use replies to segment needs	Replies/D Ms	Self-assessment naturally creates conversations	Do not pressure people
Day 25	Proof	Before/after process	TikTok/Instagram/YouTube Shorts	12–3pm	Here is the process from [STARTING POINT] to [RESULT/DELIVERABLE]. The key step is [STEP].	Want to see the full process?	Make the service tangible	Invite specific questions	Watch time, D Ms	Process proof is useful	Do not imply guaranteed outcomes
Day 26	Education	Buyer guide	Facebook/Instagram/YouTube	8–10am	Buying [CATEGORY]? Use these 4 criteria: [CRITERION 1], [2], [3], [4]. Your best choice depends on your situation, not just the lowest price.	Share this with someone comparing options	Help buyers make decisions	Answer product-selection questions	Saves/shares	Decision guides build trust	Do not misrepresent competitors
Day 27	Referral	Customer appreciation	WhatsApp/Facebook/Instagram	6–9pm	Thank you to everyone who has supported [BUSINESS]. If our work has genuinely helped you and you know someone facing the same problem, feel free to introduce us.	Refer someone who needs this	Encourage legitimate referrals	Thank referrers	Referral enquiries	Satisfied customers can become acquisition channels	Do not buy fake reviews
Day 28	Offer	Last-call only if true	All suitable channels	12–3pm	If [REAL DEADLINE/STOCK LIMIT] applies, here is the final reminder for [OFFER]. After [DATE/TIME], [WHAT CHANGES].	Message “ORDER”	Create clarity around a real deadline	Close open enquiries	Orders/conversion	Real deadlines can aid decisions	Never manufacture scarcity
Day 29	Review	Results post	Facebook/Instagram/WhatsApp	8–10am	This month I learned [LESSON 1], [LESSON 2] and [LESSON 3]. Next month I will focus more on [TOPIC].	What would you like to see next?	Build community and learn	Record feedback	Replies, returning viewers	Audience feedback improves content planning	Do not reveal private analytics unnecessarily
Day 30	Conversion	Core offer + next step	All suitable channels	12–3pm	If you are [TARGET CUSTOMER] and need [OUTCOME], here is the simple next step: [OFFER]. You get [INCLUSIONS]. To ask a question or order, [CTA].	Message “READY”	Give the audience a clear conversion path	Follow up with permission and relevance	Qualified leads, orders	Clarity makes action easier	Do not pressure people into buying

HOW TO REUSE THE CALENDAR

After Day 30, do not simply repeat the same words. Keep the structure, replace examples with real customer

questions, and use your own analytics to identify the topics, formats and CTAs that generate meaningful business outcomes.

12. Sales & Conversion Checklist

A sale should feel like a clear decision, not a forced decision. Your job is to understand the prospect's situation, determine whether your offer fits, explain the offer accurately, answer objections and provide an easy next step.

Conversation flow

1. Acknowledge the enquiry.
2. Ask one or two useful qualifying questions.
3. Confirm the customer's actual need.
4. Explain the most relevant offer.
5. State price and what is included.
6. Explain delivery/fulfillment and timing.
7. Answer objections honestly.
8. Give the exact ordering/payment step.
9. Confirm the order.
10. Follow up after fulfillment.

Copy-and-paste sales templates

Situation	Template
First response	Thanks for reaching out about [PRODUCT/SERVICE]. To recommend the right option, may I ask what you are trying to achieve with it?
Qualification	Thanks. Based on what you described, the key thing to consider is [CRITERION]. Are you looking for [OPTION A] or [OPTION B]?
Offer explanation	Based on your needs, [OFFER] may be the better fit. It includes [INCLUSIONS] and costs [PRICE]. [DELIVERY/ACCESS] is handled by [METHOD].
Follow-up	Hi [NAME], just checking in on the information I sent about [OFFER]. If you have any questions or need help deciding, feel free to ask.
Order confirmation	Your order for [PRODUCT/SERVICE] has been received. Total: [AMOUNT]. Next step: [NEXT STEP]. Expected fulfillment: [TIMEFRAME].
Complaint acknowledgement	Thanks for letting us know. I understand the issue is [SUMMARY]. I will review the details and come back with the next step based on our stated policy.

- ☐ I respond professionally and within a realistic timeframe.
- ☐ I ask enough questions to avoid recommending the wrong offer.
- ☐ I state the price clearly.
- ☐ I explain what the customer receives.
- ☐ I explain fulfillment or delivery.
- ☐ I never claim guaranteed outcomes I cannot guarantee.
- ☐ I record serious enquiries and their status.

- ☐ I follow up without harassment.
- ☐ I close the loop after the customer buys.
- ☐ I ask satisfied customers for legitimate feedback or referrals.

13. Customer Service Checklist

- ☐ Customer messages have a defined response owner.
- ☐ Common questions have clear answers.
- ☐ Customers are told what happens next.
- ☐ Orders are confirmed before fulfillment.
- ☐ Delivery expectations are realistic.
- ☐ Delays are communicated proactively.
- ☐ Complaints are acknowledged respectfully.
- ☐ Refund/return terms are applied consistently.
- ☐ Customer data is handled responsibly.
- ☐ Reviews/testimonials are requested honestly.
- ☐ Customers are not pressured into leaving positive reviews.
- ☐ Repeat customers receive relevant follow-up rather than random spam.

14. Fulfillment & Operations Checklist

- ☐ Inventory or service capacity is checked before accepting an order.
- ☐ Customer name and contact are recorded accurately.
- ☐ Product/service details are recorded.
- ☐ Quantity/package is recorded.
- ☐ Price and payment status are recorded.
- ☐ Delivery location or access method is confirmed.
- ☐ Special instructions are recorded.
- ☐ Order status is updated.
- ☐ Proof of fulfillment/delivery is retained where appropriate.
- ☐ Customer receives a completion message.
- ☐ Post-purchase support instructions are provided.
- ☐ Any refund/return request is logged and handled according to policy.
- ☐ Operational problems are reviewed weekly.

15. Do's and Don'ts

Topic	DO	DON'T	Better alternative
-------	----	-------	--------------------

Topic	DO	DON'T	Better alternative
Be consistent	Publish on a schedule you can maintain.	Disappear for weeks then expect instant sales.	Choose a sustainable frequency.
Use real proof	Show genuine demonstrations and customer feedback with permission.	Invent testimonials or results.	Document real work and outcomes.
Price clearly	Explain what the price includes.	Hide price until the last moment when clarity is possible.	State price and scope confidently.
Build relationships	Reply to relevant comments and enquiries.	Send repetitive unsolicited messages.	Use permission-based follow-up.
Create useful content	Teach, demonstrate and answer questions.	Post only adverts.	Use a content mix.
Protect accounts	Use strong passwords and 2FA.	Share admin credentials casually.	Use role-based access where available.
Follow rules	Read current platform policies.	Try to bypass restrictions.	Adapt your method to current rules.
Use original/authorized content	Create your own assets or use properly licensed material.	Copy other people's content.	Ask permission or use licensed resources.
Use scarcity honestly	Use genuine deadlines or stock limits.	Invent fake countdowns.	State real constraints only.
Follow up professionally	Check whether the prospect needs clarification.	Pressure people repeatedly.	Use a reasonable follow-up sequence.
Measure business outcomes	Track leads, conversion and repeat purchases.	Judge success by likes alone.	Connect content metrics to business metrics.
Handle complaints	Listen, document and apply policy consistently.	Argue publicly with customers.	Move sensitive issues to a suitable private channel.

16. New Business / No-Audience Strategy

If your business is new, your first goal is not to look famous. Your first goal is to become clear, useful, visible and trustworthy to a small group of relevant people.

If you have no followers

- ☐ Choose one primary audience.
- ☐ Choose one core problem to discuss repeatedly.
- ☐ Create a simple profile that explains what you do.
- ☐ Publish useful content before expecting people to buy.
- ☐ Invite genuine conversations.
- ☐ Use your existing network appropriately and without spam.
- ☐ Participate in relevant communities where allowed.
- ☐ Ask early customers for genuine feedback.
- ☐ Use collaborations with complementary businesses.
- ☐ Review what attracts the right people and repeat what works.

MEGATECH TECHNOLOGIES SUPPORT

If your business is new, you have no audience, you are unsure how to grow, or you want to start a business but do not know which model to choose, MegaTech Technologies can provide personalized business-growth guidance. The goal is to adapt the framework to your specific business, product, audience, resources, location and goals.

17. Engagement & Growth Troubleshooting

Problem	Likely reason	Next action
I get views but no enquiries.	Content may entertain without connecting to a buying problem.	Add clearer problem-based content, proof and relevant CTAs.
I get followers but no sales.	Followers may not be the right audience or the offer may be unclear.	Audit audience fit, offer clarity, price, proof and conversion path.
People ask for price and disappear.	They may not understand value, fit or total cost.	Explain outcome, inclusions, proof, delivery and who the offer is for.
Nobody comments.	The content may be difficult to respond to.	Use simple questions, polls, comparisons and specific prompts.
People do not trust me.	There may be insufficient evidence or consistency.	Show process, demonstrations, transparent information and genuine feedback.
I cannot post consistently.	The system may require too much production effort.	Create repeatable formats, batch content and repurpose ideas.
I get enquiries I cannot fulfill.	Content may be too broad or the offer lacks qualification.	Clarify who the offer is for and qualify before accepting orders.
My content is copied by others.	Public content can be replicated.	Strengthen your brand voice, original demonstrations and customer relationships; document ownership where appropriate.
A platform feature is missing.	Availability can depend on country, account, eligibility or product.	Check current official platform documentation rather than assuming the feature exists.

18. Weekly and Monthly Review

Weekly review checklist

- ☐ What content generated the most relevant reach?
- ☐ What content generated meaningful conversations?
- ☐ How many qualified enquiries did I receive?
- ☐ How many enquiries became customers?
- ☐ Which objections appeared repeatedly?
- ☐ Which products/services received the most interest?
- ☐ What customer questions should become content?
- ☐ What operational problem occurred?

☐ What should I stop, start and continue next week?

Monthly review dashboard

Metric	This month	Last month	Change	Decision
Relevant reach/views				
Profile visits				
Followers				
Meaningful engagements				
Conversations				
Qualified leads				
Orders				
Conversion rate				
Revenue				
Gross profit estimate				
Repeat customers				
Referrals				

MEASURE WHAT YOU CAN ACT ON

A metric is useful when it helps you decide what to repeat, change, stop or test. If a metric does not influence a business decision, do not let it dominate your review.

19. Personalized Strategy Offer

Want a Checklist Built Specifically for Your Business?

A general checklist gives you a framework, but no general guide can perfectly account for your exact product, audience, location, resources, competitors, operating constraints and goals.

You can request a personalized Social Commerce Business Checklist, Audience Growth Strategy, Content Calendar, Sales Strategy or Business Growth Plan from MegaTech Technologies.

A personalized version can include

- ☐ Your exact product or service.
- ☐ Your target audience.
- ☐ Your most suitable starting platforms.
- ☐ Your content pillars.

- ☐ A practical posting calendar.
- ☐ Copy-and-paste posts adapted to your niche.
- ☐ A customer acquisition strategy.
- ☐ A sales and follow-up process.
- ☐ A growth strategy.
- ☐ KPIs and review metrics.
- ☐ A business-specific action plan.

NO GUARANTEES

Personalized strategy is designed to improve clarity, execution and decision-making. It cannot guarantee followers, customers, sales or income because results depend on the market, offer, execution, competition, customer behavior and many other factors.

20. Platform Verification & Current-Facts Notes

The following notes were checked against official platform documentation on August 22, 2026. They are included to prevent the guide from presenting changing platform features as permanent facts.

TikTok

TikTok's official Business Account documentation describes Business Accounts as providing business-oriented tools and analytics. TikTok's June 2026 business-verification documentation lists Nigeria among markets where Business Account verification is available, while noting that feature availability can vary by market and account. TikTok's current TikTok Shop Seller Center documentation lists the countries where Seller Center is available and Nigeria is not on that list. Therefore, a Nigerian beginner should not be told that TikTok Shop is automatically available; use TikTok primarily for discovery and conversion through an available path unless the account explicitly shows an eligible commerce feature.

Official references: TikTok For Business Business Account; TikTok Business Verification; TikTok Shop Seller Center.

Facebook / Meta

Meta's official business documentation describes Facebook Pages as a business presence where businesses can share information, manage messages and understand engagement. Meta also documents click-to-message advertising that can send people into Messenger, Instagram or WhatsApp conversations. Exact ad, commerce and messaging features should still be checked in the account and current Meta documentation before implementation.

YouTube

YouTube's current Help documentation lists Nigeria among countries where viewers can buy products from creators or brands featured in content, while specific creator Shopping/affiliate eligibility is more restricted. The practical recommendation in this guide is therefore to use YouTube strongly for searchable education, demonstrations and discovery, while treating native shopping tools as eligibility-dependent.

WhatsApp and Instagram

WhatsApp Business and Instagram features can vary by account, country and product rollout. Before publishing a version of this guide as a definitive setup manual, verify the current official help/business documentation for catalogues, messaging, links, commerce tools, account types, advertising destinations and eligibility.

21. About the Author

Engr. John Alagwu is a Business Growth Strategist and Consultant, Website Designer and Laptop Repair Specialist, and Digital Course Creator. His work combines practical business growth strategy, digital solutions, website development, technology services and practical digital education.

Through digital video courses and practical resources, he covers popular learning and professional niches while helping people turn ideas into clearer, more actionable systems. His approach emphasizes implementation: defining the problem, selecting an appropriate strategy, creating useful assets, building a customer journey and improving the process through feedback.

PRACTICAL PHILOSOPHY

The framework gives you the roadmap. The copy-and-paste calendar gives you what to post. The checklist tells you what to do. Your consistency and effort create the progress.

23. Final Action Plan

Use this page as your launch checklist. Do not wait until everything is perfect. Complete the essentials, launch, observe, learn and improve.

☐ Choose one social-commerce business model.

- ☐ Define one target customer and one primary problem.
- ☐ Choose one primary social platform and one supporting channel.
- ☐ Prepare your product/service offer.
- ☐ Set a price based on real costs and customer value.
- ☐ Set up your business profile and secure the account.
- ☐ Prepare your customer enquiry and order process.
- ☐ Create your first three content pillars.
- ☐ Prepare the first seven days of content.
- ☐ Publish consistently and respond to genuine engagement.
- ☐ Track conversations, leads and orders.
- ☐ Review objections and turn them into content.
- ☐ Improve your offer and sales process based on evidence.
- ☐ Add a second platform only when the first system is manageable.
- ☐ Review the business weekly and monthly.

Your 7-Day Launch Sprint

Day	Focus	Action	Evidence of completion
Day 1	Business model + target customer	Choose model, audience and problem.	Completed one-sentence positioning.
Day 2	Offer + pricing	Finalize product/service, price, inclusions and fulfillment.	Ready-to-explain offer.
Day 3	Profile setup	Set up primary platform, bio, contact path and security.	Public-ready profile.
Day 4	Content preparation	Create first 5–7 posts/videos/statuses.	Content bank ready.
Day 5	Audience activation	Publish, respond, participate appropriately and start conversations.	First engagement data.
Day 6	Sales process	Test enquiry, qualification, payment and order flow.	A real person can complete the process.
Day 7	Review	Record what happened and choose next week's priorities.	One-page weekly review.

FINAL REMINDER

Do not confuse activity with progress. Posting is activity. Learning what attracts the right audience, creates conversations and leads to satisfied customers is progress. Build the system one stage at a time.
